MASTER OF SCIENCE IN COUNSELLING PSYCHOLOGY

Develop the essential skills and competencies to work as a counselling psychologist specializing in adult populations with a range of psychological health outcomes

The Master of Science in Counselling Psychology program prepares students with in-depth knowledge and professional training to apply psychological theories and models to help adult populations with a range of psychological concerns from trauma and addiction to stress management and performance. License-eligible graduates of the program will have experience in psychological assessment, case formulation, research and evidence-based intervention in the context of adult mental health.

Professional Outcomes

Students will be prepared for a variety of careers in adult mental health settings in different environments, i.e., government agencies, healthcare organizations, private practices, and research. Employment growth over the next decade will be driven by a greater demand for services in mental health centers, social service agencies and hospitals, aligned with the United Arab Emirates' national agenda to work towards prevention and better management of mental health at a population level.

Faculty

Program courses are taught by faculty who hold PhDs from some of the world's most prestigious universities. Faculty members have built a stellar reputation for their groundbreaking research, published works, and their insights into an exceptionally wide range of psychological issues at both a national and international level. As faculty members are also highly qualified and trained psychologists, students will gain valuable insights from their expertise and experiences.
