

# CNHS Alumni Portfolios

**Sharifa Al Adawi** – Graduate from Zayed University, 2009, Environmental Science. Currently working at **Dolphin Energy as Head of HSE – Performance**. Studying Master's from Hamdan Bin Mohamed Smart University specialized in Organizational Excellence. Established a project for fulfilling wishes for Leukemia patients and/or cancer patients called 'Youthful Hearts'. I do hold lead certificate in internal audit of OSHAS 18001, in addition to NEBOSH certificate as well as other related HSE certification. My work requires me to travel a lot to Qatar to ensure health and safety of our employees over there is well maintained. I do love volunteering work since I was at Zayed University, continued to do the same during my work life. Had the chance to be a member at Mentor and leadership program under Alumni Association.

**Quote:** "Working, studying, develop new projects that helps the community is my patient all at once. I do enjoy every second spent in all three. This is what Zu taught me to be able to do multi tasks at once".

**Abdulla Alobeidli**, graduated from Zayed University in 2015, Environmental Sciences and Sustainability. Currently, this is my 24th year of service in the UAE Navy. Enrolled in a MSc. program in Remote Sensing and GIS at UAE University and writing my thesis on monitoring marine water quality using space-borne satellite. I studied Marine Engineering in 1996 in the Netherlands. My work is a combination of Marine Engineering, ship building, project management and health and safety. I used to be a sailor on the UAE Navy frigate, cruised around the three oceans and sailed to many nations to reinforce and deliver the UAE's peaceful vision around the world. I am an insatiable reader and a swimmer. I consider my ZU experience as one of the most substantial turning points in my life, it has opened my mind into new horizons and life perspectives. My message is: you never know, life turns on a DIME.

**Hessa AlShaibi** – Zayed University honor degree graduate, 2016. Bachelor degree of Sciences in Public Health and Nutrition. Currently working as a **dietitian at Dubai Healthy Authority (DHA)**.

Zayed University gave me a great experience not only educational wise but also it significantly contributed in developing many skills including leadership, communication, and project management. This was through my participation in extracurricular activities such as Peer Assistant Leader Program, Creative Healthy Initiative Project, Student Success Leaders and Representatives, and other programs.

My job requires many skills but specifically it requires planning and management skills as my main role focuses on community awareness and program planning. I believe that Zayed University well prepared me for my career and I am very confident that one day, hopefully, I will be able to achieve my career goal.
